## Summary

---

Frontend Developer focused on building scalable, modern, and high-performance web applications using React.js, Next.js, and TypeScript. Experienced in turning complex logic and clean designs into seamless user experiences, with solid hands-on project execution including production-focused architectures. Passionate about continuous learning, clean code, and transforming ideas into robust digital products.

## Projects

---

**PineUp** 🌐, *Frontend Web Application* 06/2026 – 07/2026

- Built a production-focused social networking platform with Next.js, React, TypeScript, and Material UI, featuring JWT authentication, protected routes, REST API integration, and responsive UI.
- Implemented social features including infinite-scroll feeds, posts, likes, bookmarks, comments, follows, profiles, search, and real-time notifications.
- Integrated TanStack Query for caching, request deduplication, optimistic updates, and pagination, with React Hook Form and Zod for validated forms.

**Pine Notes** 🌐, *Privacy-First Notes App* 07/2026 – 08/2026

- Built a dependency-free, local-first notes application using HTML5, CSS3, and Vanilla JavaScript ES modules, storing all data locally through the browser.
- Developed modular state management, Markdown editing, search, command palette, keyboard workflows, themes, backups, and responsive UI.
- Implemented versioned persistence, migrations, defensive validation, frontend security, accessibility features, and automated Node.js tests.

**ROTIX** 🌐, *Cyber-Fluid Pipeline Puzzle Game* 07/2026 – 08/2026

- Built a dependency-free browser puzzle game with Vanilla JavaScript ES modules, featuring 30 handcrafted levels, dual-channel power propagation, progressive difficulty, and real-time pressure mechanics.
- Developed a graph-based solver powering hints and diagnostic auto-solve, alongside persistent progression, level unlocking, and exact solved-board restoration.
- Implemented English/Arabic localization with RTL support, Web Audio, haptic feedback, keyboard controls, responsive UI, and accessibility-focused interactions.

## Technical Skills

---

### Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript

### Frameworks & UI:

React.js, Next.js, Material UI, Tailwind CSS

### State & Data:

Redux Toolkit, TanStack Query, Axios, REST APIs

### Forms & Validation:

React Hook Form, Zod

### Tools:

Git, GitHub, Vercel, VS Code

### Soft Skills:

Problem Solving, Clean Code, Attention to Detail, Continuous Learning, Adaptability

## Languages

---

**Arabic** — Native/Bilingual

**English** — Proficient
